Copies of both the Original Certificate of Correction and the Form PTO-1050 sent with Patentee's original request are enclosed.

Since this error is believed to be the error of the Patent Office, the new Certificate of Correction should be

(37) **ABSTRACT**

A process for estimating successive values of digital symbols which can each take M different possible values, on the basis of the successive values of digital samples each of which results from the combination of at most L successive symbols. This process includes a stage by stage progression through a trellis of the Viterbi type with M^L states, with k being less than or equal to L-1. All the stages are respectively provided with aggregate metrics.
